**DETAILED ACTION**

1. Claims 1-14 are currently pending in the instant application and are subject to a lack of unity requirement.

***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. **Group I:** Claims 1-6 drawn to sym-tri-indole derivatives of formulas 1 and 3 and processes for preparing sym-tri-indole derivatives of formulas 1, 5, and 7.
- II. **Group II:** Claims 7-11 drawn to sym-tri-indole derivatives of formula 11 and processes for preparing sym-tri-indole derivatives of formulas 10, 11, and 14.
- III. **Group III:** Claims 12-14 drawn to sym-tri-indole derivatives of formulas 13 and 15 and a process of preparing sym-tri-indole derivatives of formula 15.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

PCT Rule 13 which pertains to the Unity of Invention states that, "[t]he international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept." Furthermore, 37 CFR 1.475 part (b) states the following: "An international or a national stage application containing claims to different categories of invention

will be considered to have unity of invention if the claims are drawn only to one of the following combinations of categories:

- (1) *A* product and *a* process specially adapted for the manufacture of said product; or
- (2) A product and a process of use of said product; or...", emphasis added.

Applicant's claims are drawn to *multiple* products and *multiple* methods of preparing the distinct products.

The claims, therefore, lack unity of invention.

Accordingly, Groups I-III are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept. Therefore, since the claims do not relate to a single general inventive concept under PCT Rule 13.1 and lack the same or corresponding special technical feature, the claims lack unity of invention and should be limited to only a product or a method of use. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

### *Election of Species*

3. As an additional requirement, with the election of any one of **Groups I-III**, an election of species of a particular compound is also required. In order for this election to be considered fully responsive to this requirement the election **must include**:

#### **Groups I-III:**

- a) the name and structure of the instantly claimed compound
- b) the location of the species (a) within the claims or (b) within the specification,

- c) the claims that read on the elected species,
- d) and a definition of the exact substitutions,  
e.g. R<sub>1</sub> is Hydrogen, X is oxygen, etc...

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined** even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.
